Day-12

Test Case

Description	Test Steps	Validation
Modify a banner	1. Navigate onto admin panel ->	1. Validate the presence of
	Catalog -> Banners	modified Banners header
	2. Modify anyone Banner name	2. Validate the error message
	and Save	3.1. Validate the success
	3. Attach a file and Save	message
		3.2. Validate the presence of
		modified record in the admin
		panel table
		3.3 Validate the presence of
		modified record in the DB table

Steps Executed:

- Login to the admin panel with user id and password.
- Select a banner record to modify the banner name.
- Save the record with modified banner name and validate the success message for modification, validate the presence of banner, validate the presence of record in admin panel and in the database.

             home.ClickOnBannerEdit();
             home.EnterBannerName();
             home.ClickonTheSaveButton();
             //1.Validate the presence of modifies banner header
             WebElement Banner=
driver.findElement(By.xpath("//table[@id='dataTableExample2']/tbody/tr[1]/td[2]"));
             String Banner1=Banner.getText();
             System.out.println("The new Banner added is :" +Banner1);
             Assert.assertEquals(Banner1, Bannername);
             //3.1.Validate the Success Message
             WebElement Msg=driver.findElement(By.xpath("//div[@class='alert alert-
success alert-dismissible']"));
             String Success=Msg.getText().replace("x","").trim();
             System.out.println("The success message is :" +Success);
             Assert.assertEquals(Success, SuccessMessage);
             //3.2 Validate the modified record data 'ForTestChange' is the newly
added reocrd
             Assert.assertEquals(Banner1, Bannername);
             //3.3 Validate the presence of modified record in db table
             Connection c =
DriverManager.getConnection("jdbc:mysql://foodsonfinger.com:3306/foodsonfinger_atozgr
oceries",
                          "foodsonfinger_atoz", "welcome@123");
             Statement s = c.createStatement();
             ResultSet rs = s.executeQuery("SELECT * from as banner where
name='ForTestChange' ");
                while (rs.next())
                          System.out.println("The coupon name added:"
+rs.getString("name"));
                          Assert.assertEquals(rs.getString("name"), Bannername);
                //2.Validate the error message
                //Login with the user id alone and click on login button and validate
the error message
                System.out.println("To Check the error message");
                driver.navigate().to("https://atozgroceries.com/admin");
                home.EnetrEmailAddress(userName);
                home.ClickonLoginButton();
                WebElement Error=driver.findElement(By.xpath("//div[@class='alert
alert-danger alert-dismissible']"));
                String ErrMessage= Error.getText().replace("x","").trim();
                System.out.println("The error message:" +ErrMessage);
           Assert.assertEquals(ErrMessage, ErrorMessage);
```

}

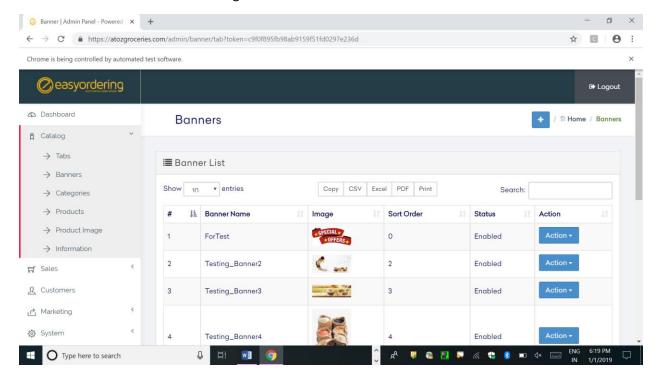

}

Screenshot of steps executed:

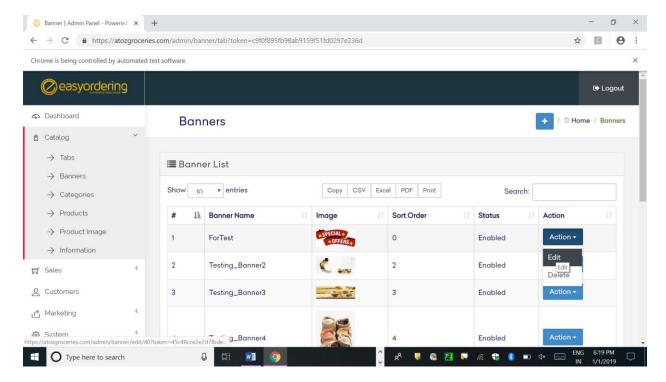

*Login to the admin panel with user id and password

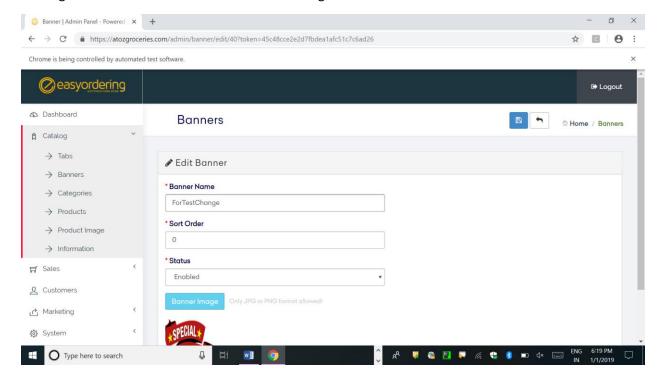

*Click on the 'Banner' under 'Catalog' tab

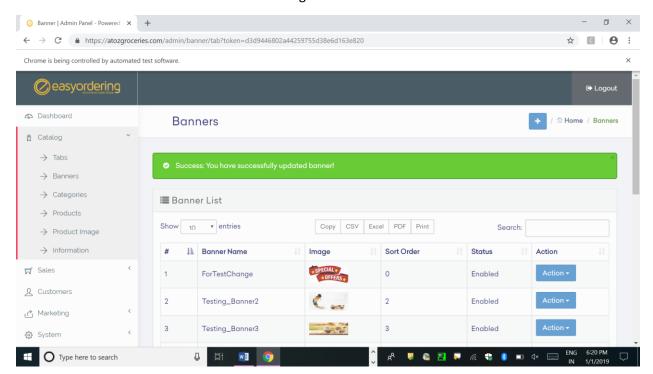

*Edit is done to the 'ForTest' banner name record

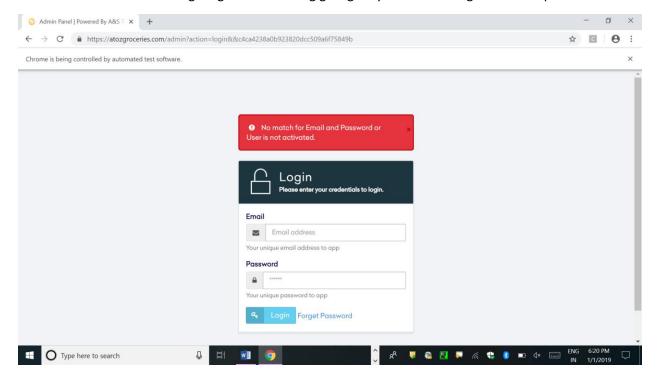

*Change the name from 'ForTest' to 'ForTestChange'

*Save the record and validate the success mesage

*To validate the error message login is done using giving only user id and login button is pressed

*Eclipse output
